## Estimates of Jute , 2009-2010

### Introduction

Jute is one of the major crop in Bangladesh. This year at the sowing period, favourable weather condition, electricity management was favourable all over the country. But at the plantation stage there were hardly any rain throughout the country. As a result coverage area of Jute crop has been declined slightly but per hectare yield and production increased significantly.

Government attitude towards irrigation was keen and full attention was paid on rural electricity management system throughout the country. There was no artificial crisis of fertilizers. Though supporting all these amenities from the part of government, coverage area of Jute crop dropped slightly only due to draught throughout the country.

### Area:

Total area under Jute crop has been estimated at 4.16 lakh hectares this year as compared to 4.20 lakh hectares of the last year which is 0.98 % lower. Estimates of total area of this year and the last year are as follows:

**Table-1 : Estimates of Total Area of Jute Crop**

Crop	2008-2009		2009-2010		Percentage(%) changes over previous year
	Area (in acres)	Area (in hectares)	Area (in acres)	Area (in hectares)	
Jute	10,39,030	4,20,473	10,28,832	4,16,346	( - ) 0.98

### Yield Rate:

Average yield rate of 2009-2010 has been estimated at 12.225 bales per hectare which is 9.89 % higher as compared to that of last year. Estimates of average yield rate are as follows:

**Table-2 : Estimates of Yield Rate of Jute Crop**

Crop	2008-2009		2009-2010		Percentage(%) changes over previous year
	Yield per acre (Bales)	Yield per hectare (Bales)	Yield per acre (Bales)	Yield per hectare (Bales)	
Jute	4.50	11.125	4.95	12.225	( + ) 9.89

## **Production:**

Total Jute production of 2009-2010 has been estimated at 5.09 million bales as compared to 4.68 million bales which is 8.81 % higher than that of last year. Estimated production of Jute crop of this year and of last year are as follows:

**Table-3 : Estimates of Production of Jute Crop**

Crop	2008-2009	2009-2010	Percentage(%) changes over previous year
	Production (Bales)	Production (Bales)	
Jute	46,77,740	50,89,728	( +) 8.81

Estimates of area, yield rates and production by zillas and regions are given in table-1 appended.

(Akhtar Jahan)  
Director
