Estimates of Potato, 2009-2010

Introduction

Potato cultivation has been getting popular in Bangladesh over the last several years. The weather condition was favourable during the sowing period in this year. The area of HYV potato crop increased significantly due to good return of the cultivators. But the area of local variety has been decreased by (-) 4.76% over the last year. The reason was that the farmers were interested to grow high yielding variety instead of local variety. Observing the field reports it reveals that good management and distribution system of seed and fertilizer brought substantially higher production of this crop. More over there was no climatic disaster against potato production. As a result, the production of potato increased significantly in this year.

Area

Total area under potato crop has been estimated at 10,73,846 acres (4,34,562 hectares) in this year compared to 9,77,540 acres (3,95,589 hectares) of the last year. Comparative area estimates of this year (2009-10) as well as last year are shown below;

Estimates of Total Area of Potato Crop by Type

(Contd.)

Production

Total potato production has been estimated at 79,30,240 metric tons compared to 52,68,327 metric tons of the last year which is 50.53 % higher. Estimates of production of this year and the last year are as follows ;

Total Potato	52,68,327	79,30,240	(+) 50.53%

Estimates of area, yield rates and production by district and region are appended in table 1-3.

Adjusted Figure of Potato Production (2009-10) :

The adjusted figures of area, yield rate and production of potato for the year 2009-10 have been estimated for approval as per decision taken in the meeting held on 08-08-2010 among the officials of BBS, DAE and SPARSO. The adjusted figures of area, yield and production of potato has been obtained using the figures of area, yield rate of BBS and DAE. The area of BBS and DAE are 4.35 lac hectares and 4.73 lac hectares and the yield rate per hectare are 18.249 metric tons and 17.81 metric tons respectively. The weighted average area is 4.5327 lac hectares and the weighted average yield rate is 18.0205 metric tons per hectare. Thus the adjusted production of potato has been estimated 81.68 lac metric tons through the weighted average area 4.5327 lac hectares multiplied by the weighted average yield rate 18.0205 metric tons per hectare.

Adjusted Estimates of Area, Yield & Production of Potato Crop for the year 2009-10

Crop	Area (Lac hectares)	Yield Rate per hectare (M. Ton)	Total Production (Lac M. Tons)
Potato	4.5327	18.0205	81.68
