MESSAGE

Bangladesh Bureau of Statistics (BBS) has been conducting the Multiple Indicator Cluster Survey (MICS) since 1993 in order to provide information on the situation of children and women. As many as nine rounds of surveys were conducted between 1993 and 2006. The tenth round of the MICS survey was conducted in May 2009. In this round the sample size has been increased to a large extent to provide estimates at the sub-national levels (upazila). The MICS 2009 questionnaire covered 23 indicators related to children and women.

It is encouraging that the preliminary report of the survey was published in January 2010 and final report in June 2010. The divisional reports are currently being published.

Survey result will be very useful to planners, policy makers, researchers and other stakeholders to prescribe appropriate policy measures to achieve the MDG targets by 2015.

I would like to extend my sincere thanks to Md. Shahjahan Ali Mollah Director General, BBS, Md. Shamsul Alam, Project Director, Monitoring the Situation of Children and Women Project for bringing out this report within a short span of time. I also take the opportunity to express our gratitude to Mr Carel de Rooy Representative, UNICEF Dhaka office Bangladesh for his technical support and cooperation.

PREFACE

The purpose of the 2009 Multiple Indicator Cluster Survey (MICS), conducted jointly by the Bangladesh Bureau of Statistics and UNICEF, was to provide disaggregated data on children and women at the national and sub-national levels. The survey was the first attempt ever in Bangladesh by a national household survey to collect data at the sub-district level for a number of key social sector indicators covering the education, environment, health and child protection sectors. This report presents the final analysis of the data for 23 indicators covered by the survey.

I hope the survey findings contribute to Bangladesh's ongoing efforts in monitoring the achievement of the Millennium Development Goals (MDG). The availability of sub-district (upazila) data, in particular provides a robust baseline for the social sectors of the five-year National Development Plan currently being prepared by the government. The same survey will be repeated in 2012 and 2015 to enable the comparison of progress at national and sub-national levels. Over time, individual districts and sub-districts will be able to see how much relative progress they have made in comparison to others. Clear identification of upazilas and districts that perform exceptionally well will be possible so that these can be acknowledged. Likewise, those that under-perform will also be identified so that they can be supported to achieve MDGs with equity.

An issue of great concern emerging from the analysis of the rich data set being made available in this report, are the increasing geographic disparities even whilst averages of several social indicators are improving. Mitigating these disparities and social inequities is a crucial strategic issue that will require increased attention as Bangladesh progresses towards middle income status during the next decade. Failure to do so could constrain poverty reduction efforts and even economic growth.

Several short follow-up studies based on this data will be shared over the forthcoming months related to: the use of a composite social sector index to target low performing geographic areas; disparities in urban areas; gender; governance and other topics.

I hope the report will be useful to policy-makers, elected leaders, researchers and administrators as well as to development partners in developing evidence-based policies and programmes.

UNICEF is committed to continue supporting the Government of Bangladesh in its challenging social development endeavours.

Carel de Rooy

Representative
UNICEF Bangladesh
