## Introduction

### 1.1 Background

Gender Equality is imperative to ensure equity and overcoming barrier of economic growth, poverty reduction and social development. The Government has emphasized on establishing equal rights of women and men in state and public life and ensure their full and equal participation as declared in the National Women Development Policy 2011(NWDP) in the light of the Constitution. The 8FYP emphasizes on elimination of women and girls' extreme poverty and also ensures social security and social equity by developing them as resources and harnessing their full potential.

### 1.2 Objectives

a) To compile gender statistics from existing statistics;
b) To use existing statistics to analyze gender equality issues;
c) To transfer knowledge of gender statistics into the organizations, policymakers and other stakeholders;
d) To identify relevant gender indicators; and
e) To disseminate gender statistics in a user friendly and holistic manner.

### 1.3 Methodology

The information in this booklet has primarily been extracted from the publications of Bangladesh Bureau of Statistics (BBS) and other relevant government departments and agencies. The sources are acknowledged beside in each table or graph.

Most of the tables and graphs provide absolute numbers and/or proportions (\%) for certain attributes for both women and men.

Some of the charts and graphs reflect both the absolute numbers and sex distributions for various groups. The total figures in the tables are not always in agreement with the partial figures because of rounding off.

For detail information on data quality, are referred to the sources quoted.

## Gender Equality

### 2.1 Concepts of Key Terms:

Sex refers to the biological differences between women and men.
These differences are universal and do not change between cultures.
Gender is a social and cultural construct. The concept of gender includes the expectations held about the roles and behaviors of women and men (femininity and masculinity). These expectations are learned. Gender-based roles and other attributes change over time and vary with different cultural contexts.

Gender equality means that women and men have equal power to shape society and their own lives. Individuals of both sexes are free to develop their personal abilities and make choices without the limitations imposed by strict gender roles. This implies the same opportunities, rights and obligations in all spheres of life for realizing their full potential and for contributing to and benefiting from economic, social, cultural, and political development.

Gender issues are issues that affect one gender more the other.
Gender statistics are defined as statistics that adequately reflect differences and inequalities in the situation of women and men in all areas of life. Gender statistics have to reflect gender issues, questions, problems and concerns related to all aspects of women's and men's lives, including their specific needs, opportunities or contribution to society.

Mainstreaming a gender perspective is the process of assessing the implications for women and men of any planned action, including legislation, policies or programmes, in any area and at all levels.

To achieve gender equality in society, it is necessary to have a gender equality perspective in all areas. This strategy is called gender mainstreaming. This means that analyses of women's and
men's, girl's and boy's situations and conditions shall be included in decision making data and that the consequences of the proposals analyzed with consideration

It is a strategy for making the concerns and experiences of women as well as of men an integral part of the design, implementation, monitoring and evaluation of policies and programmes in all political, economic and societal spheres, so that women and men benefit equally, and inequality is not perpetuated.

Sex-disaggregated data is data that is cross-classified by sex, presenting information separately for men and women, boys and girls.

### 2.2 Women Development policyof Bangladesh 2010

On the policy front, the most important step has been to ratify the National Women Development Policy (NWDP) in 2011. Its vision is to "create a society where men and women will have equal opportunities and will enjoy all fundamental rights on an equal basis".

The Objectives of National Women Development Policy are as follows:

1. To establish equal rights of men and women in areas of state and public life in the light of the constitution of Bangladesh.
2. To ensure security and safety of women in all areas of state, social and family life.
3. To ensure the socio-economic, political, administrative and legal empowerment;
4. To establish human rights of women.
5. To ensure full and equal participation of women in the mainstream socioeconomic development.
6. To bring up women as educated and skilled human resources.
7. To deliver the women from the curse of poverty.
8. To remove existing men-women disparities.
9. To give appropriate recognition to women's contribution in socio-economic areas.
10. To eliminate all forms of abuse of women and female children.
11. To eliminate discrimination to women and female children.
12. To establish gender equality in politics, administration, other areas of activity, socio-economic activity, education, culture, sports and in all areas of family life.
13. To innovate and import technology favoring the interest of women and prohibit anti-women technologies.
14. To ensure taking appropriate steps to ensure sound health and nutrition of the women.
15. To ensure priority of women in provision for proper shelter and housing;
16. To arrange rehabilitation of the women affected in natural calamities and armed conflicts.
17. To extend overall assistance to ensure rights of the disabled women and women belonging to the smaller ethnic groups.
18. To arrange safety of the widow, aged, guardianless, husband abandoned, unmarried and childless women.
19. To reflect gender perspective in the mass media including positive image of the women and female children.
20. To assist in flowering of Talented, genius women of their creative potentials.
21. To provide necessary support services for development of women.
22. To provide overall assistance in ensuring the growth of women entrepreneurs.

## 2.3. $8^{\text {th }}$ five year plan of Bangladesh 2020-2025

The gender vision of the 8FYP is that of establishing "a country where men and women will have equal opportunities and rights and women will be recognized as equal contributors in economic, social
and political development". The mission is to ensure women's advancement as self-reliant human beings and reduce discriminatory barriers by taking both developmental and institutional measures.

### 2.4. SUSTAINABLE DEVELOPMENT GOAL (SDG) 5:

SDG adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. At its heart are the 17 Sustainable Development Goals (SDGs) of which goal 5 is achieve genderequality and empower all women and girls.

## TARGETS AND INDICATORS

5.1 End all forms of discrimination against all women and girls everywhere
5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex
5.2 Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking and sexual and other types of exploitation
5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age
5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence
5.3 Eliminate all harmful practices, such as child, early and forced marriage and women genital mutilation
5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18
5.3.2 Proportion of girls and women aged 15-49 years who have undergone women genital mutilation/cutting, by age
5.4 Recognize and value unpaid care and domestic work through the provision of public services, infrastructure and social protection policies and the promotion of shared responsibility within the household and the family as nationally appropriate
5.4.1 Proportion of time spent on unpaid domestic and care work, by sex, age and location
5.5 Ensure women's full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic and public life
5.5.1 Proportion of seats held by women in national parliaments and local governments
5.5.2 Proportion of women in managerial positions
5.6 Ensure universal access to sexual and reproductive health and reproductive rights as agreed in accordance with the Programme of Action of the International Conference on Population and Development and the Beijing Platform for Action and the outcome documents of their review conferences
5.6.1 Proportion of women aged $15-49$ years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care
5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education
5. a Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws
5. a.1(a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure
5. a. 2 Proportion of countries where the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control
5.b Enhance the use of enabling technology, in particular information and communications technology, to promote the empowerment of women
5. b.1Proportion of individuals who own a mobile telephone, by sex
5.c Adopt and strengthen sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels
5.c. 1 Proportion of countries with systems to track and make public allocations for gender equality and women's empowerment

## Population

This chapter contains population scenario of Bangladesh as well as some basic features. The country emerged as an independent and sovereign country in 1971. It is one of the largest deltas of the world with a total area of $147,570 \mathrm{sq} . \mathrm{km}$.

Population in 1981, 1991, 2001 and 2011
Numberin million
Million

Source: Population \& housing census 2011, BBS.
In 1981, the number of women was 42.2 million while men were 44.9. After that the population increased gradually. In 2011, the enumerated women were 71.9 and adjusted were 74.8 while enumerated men were72.1and adjusted were74.9.

## Population by age 2021

Percentage distribution and numbers in thousands

Source: Population projection of Bangladesh Dynamics and trends 2011-2061, BBS.

## Population by age 2041and 2061

Percentage distribution and numbers in thousands

Source: Population projection of Bangladesh Dynamics and trends 2011-2061, BBS.

In 2061, the population of Bangladesh is projected to be 223.3 million in the medium variant fertility level. The projected population for less than 15 years old (women $16.7 \%$ and men $17.5 \%$ ) will decrease and the proportion of 15-64 years (women $64.2 \%$ and men $66.9 \%$ ) and 65 and above old persons(women $19.1 \%$ and men $15.7 \%$ ) will increase.

## Trends of sex ratio 2003-20

Source: Bangladesh sample vital statistics 2017, BBS.

Sex ratio: The ratio of men to women in a given population usually expressed as the number of men per 100 women. In 2020, survey recorded an overall sex ratio of 100.2 men per 100 women.

Average life expectancy at birth, 1981-2020 Age

Source: Bangladesh sample vital statistics 2020, BBS.

Average life expectancy at birth is a summary measure of mortality that portrays the average longevity of life of an individual. The vital registration system in Bangladesh provides the estimates of life expectancy over the last 30 years. The expectations of life at birth for women and men were 54.5 and 55.3 in 1981. These increased to 74.5 and 71.2 years in 2020 over a period of 39 years.

## Marital status by age 2020

Percentage distribution. Women and men aged 10 and above Women
 - Single $■$ Married $■$ Widowed $■$ Divorced/Separated

## Men

Age

■Single $■$ Married $■$ Widowed $■$ Divorced/Separated

Source: Bangladesh sample vital statistics 2020, BBS.

About 60 percent of the men and a little over 63 percent of the women are currently married. Single population accounts for 38.3 percent in the case of men and 25.4 percent of women. The incidence of widowhood is more prevalent among the women $(10 \%)$ than among the men ( $1.2 \%$ ) for the overall sample. Women are at higher risk ( $1.4 \%$ ) than their men counterparts ( 0.5 ) to end their marriage in divorce.

The drop in the proportion of being single is steeper among women than among men as age advances. 100 percent of the men are single in age group $10-14$, this drop to 96.3 percent when they are aged 15-19, and further to about 73.5 percent when they reach to $20-24$. The corresponding proportions among the women are 95.6, 76.8 and 28 percent. The data also show that the child marriage is still prevalent among both women and men in Bangladesh.

## Distribution of head of household by division and type of residence, 2020

## Percentage distribution

| Background <br> Characteristics | Women <br> headed <br> household | Men headed <br> household | Total |
| :--- | :---: | :---: | :---: |
| Residence | 14.5 |  |  |
| Urban | 15.4 | 85.5 | 100.0 |
| Rural | 12.3 |  | 100.0 |
| Division | 22.6 | 87.7 | 100.0 |
| Barishal | 15.9 | 77.5 | 100.0 |
| Chattogram | 12.3 | 87.1 | 100.0 |
| Dhaka | 12.7 | 87.3 | 100.0 |
| Khulna | 11.6 | 88.4 | 100.0 |

| Rajshahi | 18.4 | 81.6 | 100.0 |
| Rangpur | 15.0 | 85.0 | 100.0 |
| Sylhet |  |  |  |
| Total |  |  |  |

Source: Bangladesh sample vital statistics 2020, BBS.

Bangladesh society is primarily a men dominant society and as a consequence of this, most families are headed by men. However, this feature is changing over time. Overall, 85 percent of the households are headed by menwith 84.6 percent in the rural area and 85.5 percent in the urban area and the remaining 15 percent by their counterpart women with 15.4 percent in the rural area and 14.5 percent in the urban area.

Incidence of poverty by sex of the head of household, 2016
Percentage
Lower poverty line
Percent

Upper poverty line
Percent

Source: Household income and expenditure survey 2016, BBS.

Lower Poverty Line: The extreme poor households are those households whose total expenditures are equal to the food poverty line.

Upper Poverty Line: The moderate poor households are those households whose food expenditure is at the level of food poverty line.

The Head Count Rates (HCR) of incidence of poverty by using CBN method is found significantly less for the women headed households than that of men headed households. Using the upper poverty line, in 2016, the HCR of incidence of poverty by sex of head of household is estimated at $19.9 \%$ for the women headed household, whereas, it is $24.8 \%$ for the men heads. In the rural areas, HCR is $20.0 \%$ for the women head and $27.1 \%$ for the men head. In the urban areas, the HCR of men household is lower than women headed household. It is $18.8 \%$ for the men headed household and $19.7 \%$ for the women headed household.

## Education

The effort of the Bangladesh Government is to bring all children into the education system providing all sorts of supports, such as, supply of free textbooks and teaching learning materials, food, etc. to make primary education accessible for all children under the slogan, 'Education for All'. It is mandatory to get every child in the primary education system to ensure the rights of basic education for all children.This chapter deals with literacy rates, level of education, school enrolment, net enrolment rate (NER), gross enrolment rate (GER) and dropoutetc.

Literacy rate by age group, 2020
Proportion (\%) of population aged 7 or above

| Age group | Total |  |  |
| :--- | :---: | :---: | :---: |
|  | Women | Men | Both sexes |
| 7 | 16.0 | 20.8 | 18.4 |
| 8 | 25.3 | 40.5 | 33.0 |
| 9 | 57.0 | 64.5 | 60.8 |
| $7-9$ | 33.1 | 42.4 | 37.8 |
| $10-14$ | 92.2 | 90.2 | 91.3 |
| $15-24$ | 95.8 | 93.4 | 94.6 |

Source: Bangladesh Sample Vital Statistics 2020, BBS

Literacy rate of population 7 years and above has been defined by the ratio of population 7 years and above who can write a letter to the total population in the same age group expressed in percentage. The literacy rate for women (72.9) is in the lower than men (77.4) and for the total population of Bangladesh stood at $75.2 \%$.

Net Enrolment Rate at primary education (NER), 2011-2020
Proportion (\%) of students aged 6-10 years

| Year | NER (\%) |  |  |
| :---: | :---: | :---: | :---: |
|  | Girls | Boys | Total |
| 2011 | 97.3 | 92.7 | 94.9 |
| 2012 | 98.1 | 95.4 | 96.7 |
| 2013 | 98.4 | 96.2 | 97.3 |
| 2014 | 98.8 | 96.6 | 97.7 |
| 2015 | 98.8 | 97.1 | 97.7 |
| 2016 | 98.8 | 97.01 | 97.96 |
| 2017 | 98.29 | 97.66 | 97.97 |
| 2018 | 98.16 | 97.55 | 97.85 |
| 2019 | 98.01 | 97.65 | 97.74 |
| 2020 | 98.25 | 97.37 | 97.81 |

Gross Enrolment Ratio (GER) at primary education, 2011-2020
Proportion (\%) of students aged 5 and above

|  | GER (\%) |  |  |
| :---: | :---: | :---: | :---: |
| Year | Girls | Boys | Total |
| 2011 | 105.6 | 97.5 | 101.5 |
| 2012 | 107.6 | 101.3 | 104.4 |
| 2013 | 110.5 | 106.8 | 108.6 |
| 2014 | 112.3 | 104.6 | 108.4 |

| 2017 | 115.4 | 108.1 | 111.7 |
| 2018 | 118.30 | 110.32 | 114.23 |
| 2019 | 114.93 | 104.49 | 109.60 |
| 2020 | 108.90 | 100.10 | 104.90 |

Source: Bangladesh Education Statistics 2020, BANBEIS.

Net enrolment is defined by the number of children (aged 6-10 yrs.) enrolled in primary level (i.e. class I-V) divided by no. of children aged 610 yrs. multiplied by 100 .

Gross enrolment is defined by the number of students ( 5 yrs . and above) enrolled in primary level (I-V class) to the total population of school age children 6-10 years expressed in percentage. For universal primary education, the gross enrolment ratios may exceed 100 percent because some pupils are below or above the official primary educational institute's age (6-10 yrs.).

## Net enrolment rate (NER) in secondary level 2011-2020

| Year | NER |  |  |
| :---: | :---: | :---: | :---: |
|  | Girls | Boys | Both |
| 2011 | 59.94 | 51.94 | 56.50 |
| 2012 | 63.58 | 51.64 | 57.37 |
| 2013 | 64.16 | 54.05 | 58.97 |
| 2014 | 67.74 | 57.04 | 62.25 |
| 2015 | 71.85 | 62.16 | 67.00 |
| 2016 | 73.10 | 63.85 | 67.84 |
| 2017 | 74.38 | 63.59 | 68.78 |
| 2018 | 74.68 | 64.47 | 69.38 |
| 2019 | 74.47 | 60.11 | 67.30 |
| 2020 | 80.62 | 62.89 | 71.89 |

Source: Bangladesh Education Statistics 2020, BANBEIS.

The net enrolment (NER) is the enrolment at a given level of education of the official school age group for that level expressed as a percentage of the corresponding population. The NER is expressed as a percentage of the eligible official school-age population for that level in a given school year corresponding population.

Gross enrolment rate (GER) in secondary level 2011-2020

| Year | GER |  |  |
| :---: | :---: | :---: | :---: |
|  | Girls | Boys | Both |
| 2012 | 71.31 | 57.04 | 61.89 |
| 2013 | 71.86 | 57.37 | 64.05 |
| 2014 | 75.88 | 62.94 | 65.58 |
| 2015 | 77.84 | 67.75 | 69.23 |
| 2016 | 81.74 | 67.11 | 72.78 |
| 2017 | 81.90 | 68.60 | 74.23 |
| 2018 | 82.50 | 69.56 | 74.64 |
| 2019 | 83.36 | 67.83 | 75.32 |
| 2020 | 85.19 | 67.13 | 75.62 |

Source: Bangladesh Education Statistics 2020, BANBEIS.

The gross enrolment rate (GER) is the total enrolment at a specific level of education, regardless of age, expressed as the percentage of the eligible official school-age population corresponding to the same level of education in a given school years. The GER is used to show the general level of participation in education, regardless of age.

Student Participation in higher secondary level 2009-2020

## Health

The importance of nutrition to achieve optimal health is unquestionable. Balanced nutrition is central to maintain good health in a dilapidated environment, fight against disease, correct imbalances in the body and provide energy and enthusiasm for life. This chapter deals with the data on age-specific maternal mortality ratio, causes of maternal death, neonatal mortality, births attended by skilled health personnel, number of antenatal care (ANC) visits, delivery places, specific antenatal care services etc.

## Trends in maternal mortality ratio, 2010-2020

Number of deaths per 1000 live births

| Year | MMR |
| :---: | :---: |
| 2010 | 2.16 |
| 2011 | 2.09 |
| 2012 | 2.03 |
| 2013 | 1.97 |
| 2014 | 1.93 |
| 2015 | 1.81 |
| 2016 | 1.78 |
| 2017 | 1.72 |
| 2018 | 1.69 |
| 2019 | 1.65 |
| 2020 | 1.63 |

Source: Bangladesh Sample Vital Statistics 2020, BBS.
The maternal mortality ratio obtained from the reported maternal deaths and numbers of live births are presented in the above chart by residence of the country. In 2020 the overall maternal mortality ratio was estimated to be 1.63 maternal deaths per 1000 live births.

## Age-specific maternal mortality ratio by age, residence and division, 2020

Number of deaths per 1000 live births

| Background characteristics | Age-specific maternal mortality <br> ratio |
| :--- | :---: |
| Maternal age |  |
| $15-19$ | 0.23 |
| $20-24$ | 0.93 |
| $25-29$ | 1.94 |
| $30-34$ | 3.10 |
| $35-39$ | 2.99 |
| $40-44$ | 5.97 |
| $45-49$ | 16.13 |
| Residence |  |
| Rural | 1.78 |
| Urban | 1.38 |
| Division |  |
| Barishal | 1.24 |

Causes of maternal mortality, 2020
Percentage distribution

| Causes of death | Total | MMR |
| :--- | :---: | :---: |
| Complex pregnancy | 23.7 | 0.39 |
| Complex delivery | 34.2 | 0.56 |
| Bleeding after delivery | 23.7 | 0.39 |
| Complex abortion | 5.3 | 0.09 |
| Bleeding at pregnancy | 10.5 | 0.17 |
| Tetanus | 2.6 | 0.04 |
| Total | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 . 6 3}$ |

Source: Bangladesh Sample Vital Statistics 2020, BBS.

In 2020, complex delivery was the leading causes of maternal mortality, which was $34.2 \%$ of total maternal deaths. The second causes were complex pregnancy (23.7\%) and bleeding after delivery ( $23.7 \%$ ).Bleeding at pregnancy period was also the important causes for maternal deaths.

Neonatal mortality and Infant Mortality by sex, 2010-2020
Number of deaths per 1000 live births

| Year | Neo-natal Mortality Rate |  | Infant Mortality Rate |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Women | Men | Both <br> sexes | Women | Men | Both <br> sexes |
| 2010 | 24 | 28 | 26 | 35 | 38 | 36 |

| 2016 | 20 | 18 | 19 | 28 | 27 | 28 |
| 2017 | 17 | 18 | 17 | 23 | 25 | 24 |
| 2018 | 15 | 17 | 16 | 21 | 23 | 22 |
| 2019 | 15 | 16 | 15 | 21 | 22 | 21 |
| 2020 | 15 | 16 | 15 | 21 | 22 | 21 |

Source: Bangladesh Sample Vital Statistics2013, 2017 \& 2020, BBS.

The Neo-natal mortality rate (NMR) isdefined as the number of infants less than one month of age during a year per 1000 live births in the same year. The overall NMR is estimated to be 15.0 deaths per 1000 live births in 2020. In 2010the Neo-natal mortality rate for girls was 24 and for the boys it was 28 per thousand live births. In 2020 it was sharply declined and the rates were 15 for women and 16 for men.

Five-year early childhood mortality rates by residence, 2017-18

Neonatal, post neonatal, infant, child and under-5 mortality rates for the 5-year period preceding the survey

## Early marriage

Marriage before the age of 18 is a reality for many youngwomen. In many parts of the world parents encourage the marriage of their daughters while they are still children in hopes that the marriage will benefit them both financially and socially, while also relieving financial burdens on the family. In actual fact, child marriage is a violation of human rights, compromising the development of girls and often resulting in early pregnancy and social isolation, with little education and poor vocational training reinforcing the gendered nature of poverty.

Age-specific marriage rates by type of residence and age, 2020
Per 1000

| Age <br> group | Rural |  | Urban |  | Total |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Women | Men | Women | Men | Women | Men |
| $15-19$ | 146.0 | 27.0 | 81.4 | 14.4 | 118.6 | 21.8 |
| $20-24$ | 44.2 | 70.4 | 37.1 | 45.2 | 40.9 | 59.4 |
| $25-29$ | 12.1 | 63.3 | 17.3 | 45.0 | 14.5 | 54.9 |
| $30-34$ | 2.8 | 24.2 | 4.6 | 22.0 | 3.6 | 23.2 |
| $35+$ | 0.5 | 2.7 | 0.5 | 2.4 | 0.5 | 2.5 |
| Total | $\mathbf{2 6 . 2}$ | $\mathbf{2 3 . 6}$ | $\mathbf{1 7 . 4}$ | $\mathbf{1 6 . 0}$ | $\mathbf{2 2 . 3}$ | $\mathbf{2 0 . 2}$ |

Source: Bangladesh Sample Vital Statistics 2020, BBS.

Because marriage is highly age-specific and demographers are primarily interested in age patterns of marriage, it is commonplace to construct age-specific marriage rates. Age-specific marriage rate is defined as the number of marriages to persons of a given age group per 1000 persons in the same age group. Age-specific marriage rates are defined in terms of persons marrying, rather than marriages. The resulting age-sex specificmarriage rates are displayed in the above table by urban -rural residence and sex.

Mean age at first marriage, 2013-2020

| Year | Mean age at first marriage |  |
| :--- | :---: | :---: |
|  | Women | Men |
| 2013 | 17.9 | 24.3 |
| 2014 | 18.3 | 24.9 |
| 2015 | 18.4 | 25.3 |
| 2016 | 18.4 | 25.2 |
| 2017 | 18.4 | 25.1 |
| 2018 | 18.6 | 24.4 |
| 2019 | 18.5 | 24.2 |
| 2020 | 18.7 | 24.2 |

## Fertility

The term fertility refers to the state of being fertile, or in other words, it is the capability of producing offspring. For a human population, it is the state of being capable to produce offspring by a woman. Fertility is thus the frequency of childbearing among the population. The importance of fertility measurement stems from the fact that it is one of the three principal components of population dynamics that determine the size, structure, and composition of the population in any country. In this chapter, we will discuss a few of these measures that include, among others, the following:
a) Age-specific fertility rate (ASFR): The age-specific fertility rates are defined as the number of live births during a specified period to women of reproductive period divided by the number of women lived in that age group during the specified period. The age-specific fertility rates (ASFRs) are considered as valuable measures of fertility to assess the current age pattern of child-bearing.
b) Total fertility rate (TFR): Total Fertility Rate (TFR) defines as the sum of the Age-Specific Fertility Rates (ASFR) over the whole range of reproductive ages for a particular period (usually a year). It can be interpreted as the number of children; a woman would have during her lifetime if she were to experience the fertility rates of period at each age.
c) Crude birth rate (CBR): The crude birth rate (CBR) is the frequency of birth in a general population and is formally defined as the number of live births during a specified period (usually a calendar year) in a delineated area per 1000 mid-year population.

Age-specific Fertility Rates by selected years, 2013-2020
Per 1000 women in the age group

Among 20-24 year olds, the age specific fertility rate have decreased from about 152 per 1000 women in 2013 to about 126 in 2020. The same pattern could be found among most of the age groups. The age specific fertility rate have also decreased among the oldest group, from 5 per 1000 to 2 per 1000. During recent years, women aged 30-34 have increased their fertility.

## Employment

This chapter presents information on labour force participation rate, employment rate, formal/Informal employment, wage/salary, timerelated underemployment, unemployment rate and outside labour force etc.

Related terms are explained below:
Labour Force: Labour force refers to persons 15 years or older who contribute or are available to contribute to the production of goods and services in the country. They are either employed or unemployed during the reference week prior to the survey.

Working age population: Working age population includes all population aged 15 years or older.

Employment: The employed comprises all persons older than a specified age who, during a specified brief period, either one week, were in (a) paid employment or (b) self-employment categories.

Informal sector: The informal sector consists of unregistered and/or small unincorporated private enterprises engaged in the production of goods or services for sale or barter.

Time related underemployment: This indicator relates to the number of employed persons whose hours of work in the reference period are insufficient (usually below 40 hours in a week) in relation to a more desirable employment situation in which the person is willing and available to engage.

Unemployment: The unemployed comprises all persons older than a specified age who during the reference period were (a) without work, (b) currently available for work and (c) seeking work.

Provision of services: Provision of services (beyond the 2008 SNA production boundary) covers general production boundary such as
household accounting, preparing meal cleaning and caring for dependent household members.

Labour force participation rate 2010, 2013, 2015-2016 and 2016-2017

Population aged 15 years and above. Percent.

Source: Labour Force Survey 2010, 2013, 2015-16 and 2016-17, BBS.

Bangladesh's labour force participation rate in 2016-17 was estimated at 58.2 per cent. By sex, the labour force participation ratewas 36.3 per cent for women and 80.5 per cent for men

Labour force participation rate by type of residence 201617

Population aged 15 years and above

## Decision-making

Empowerment refers to increasing of the multidimensional qualities of individuals and communities relating to spiritual, political, social, educational and economic strength based on gender issues. Women's empowerment lays emphasis on women's freedom of choice and power to control their own lives. This is applicable for both the personal level within the household and at the societal level within the process of social and economic change. Women represent half of the population and gender inequality exists in every nation. Without the participation of women in all spheres of life, the comprehensive sustainable social and economic development could not be achieved.

The chapter on decision-making includes information about the civil officers and staff, freedom of movement and decision-making within the household.

Employees by Ministries and Divisions\& Department and Directorates, 2020
