Bangladesh
Bureau of Statistics

United Nations
Children's Fund

The Bangladesh Multiple Indicator Cluster Survey (MICS) was carried out in 2019 by Bangladesh Bureau of Statistics (BBS) in collaboration with UNICEF Bangladesh, as part of the Global MICS Programme. Technical support was provided by the United Nations Children’s Fund (UNICEF). During data collection, UNFPA Bangladesh has also provided financial resource for quality assurance visits.

The Global MICS Programme was developed by UNICEF in the 1990s as an international multi-purpose household survey programme to support countries in collecting internationally comparable data on a wide range of indicators on the situation of children and women. MICS surveys measure key indicators that allow countries to generate data for use in policies, programmes, and national development plans, and to monitor progress towards the Sustainable Development Goals (SDGs) and other internationally agreed upon commitments.

The objective of this district summary findings report is to facilitate the timely dissemination and use of selected indicators from the Bangladesh MICS 2019. The national report is available in BBS website at www.bbs.gov.bd and www.mics.unicef.org

For more information on the Global MICS Programme, please go to www.mics.unicef.org

FOREWORD

It's my pleasure to compliment the Bangladesh Bureau of Statistics (BBS) on publishing the 'District Summary Findings Report' based on Multiple Indicator Cluster Survey (MICS) 2019.

As we have SDGs Monitoring and Evaluation Framework, data disaggregation is of great importance in tracking progress towards achieving targets beyond the national level. Disaggregating data is not only reveal patterns that can be masked by aggregate data but also help to allocate resource properly who needs it most. A core element of the global indicator framework is the disaggregation of data and the coverage of particular groups of the population in order to fulfil the main principle of the 2030 Agenda of 'Leaving no one behind'. The District Summary Findings presented a unique opportunity to support this process.

I would like to thank the Director General of BBS for providing timely support and guidance to the successful completion of the publication. Special thanks to focal point of MICS 2019 and his team for bringing out the publication after doing further analysis of MICS 2019 data. All the distinguished members of the steering committee, technical committee and monitoring committee also deserve special thanks.

I deeply acknowledge the collaboration and the support of UNICEF Bangladesh in this program.

I believe the findings will be instrumental to everyone involved in crafting strategies to improve the lives of every child and woman in Bangladesh.

May 2021

Mohammad Yamin Chowdhury

Director General

Bangladesh Bureau of Statistics (BBS)
Statistics and Informatics Division (SID)

Ministry of Planning

Government of the People's Republic of Bangladesh

PREFACE

Since 1993, Bangladesh Bureau of Statistics (BBS) has been conducting the Multiple Indicator Cluster Survey (MICS) jointly with UNICEF in order to gather information on the situation of children and women in Bangladesh. MICS 2019 is the sixth round of MICS in Bangladesh, and it is the source of 144 indicators relating to children and women. 'District Summary Findings Report' has been prepared based on the MICS 2019 data.

MICS 2019 introduced ground-breaking new modules such as child labour, social transfer, victimization and foundational learning skill which will be helpful to report on the 2030 Agenda and other globally recommended indicators related to children and women. It opens a new window to visualize the situation of the marginalized groups in the society. Since MICS 2019 encompasses all the new things, 'District Summary Findings Report' reflects most of them at the district level- that will help identifying which districts are performing well and which are lagging behind.

I would like to express my gratitude to the Secretary of the Statistics and Informatics Division, Ministry of Planning for providing guidance and valuable support for preparing this 'District Summary Findings Report'. Members of the Technical Committee and Working Group deserve special thanks for their contribution. I express my sincere appreciation to Mr. Md. Mashud Alam, Focal point, Multiple Indicator Cluster Survey (MICS) 2019 and Director, Demography & Health Wing with his team for their hard work and dedication for completing the survey and preparing this 'District Summary Findings Report'.

My special thanks to the MICS teams of UNICEF HQ, Regional Office for South Asia and Bangladesh office for their technical and financial support. My sincere gratitude towards representatives of SURCH, UNFPA Bangladesh, ICDDR,B for their excellent efforts to make it happen. To yield more sustainable benefits, we must move the focus from short-term fixes to long-term investments and work step-by-step through partnership.

It is our ardent belief that this 'District Summary Findings Report' will help the policymakers, researchers, development partners, NGOs and other stakeholders to guide the formulation of programmes and strategies for attaining goals and assessing accomplishments.

May 2021

Mohammad Tajul Islam

Representative
UNICEF Bangladesh

MESSAGE

I am delighted to see that the Bangladesh Bureau of Statistics (BBS), with technical support of UNICEF Bangladesh, has further analyzed MICS 2019 data for presenting statistical factsheets at district levels. These estimates down to the district level were possible as initially planned due to joint efforts to design a sampling methodology that incorporated this level of disaggregation following the vision of the previous MICS 2013.

The main report released in February 2020 by BBS contains disaggregated data for the national level and divisions. The district report has more than 106 indicators in 8 thematic areas, including water quality results. The factsheet will empower district administrations with authentic evidence as a single basis for monitoring the progress of programmes and projects until results from the next MICS survey.

I would like to quote the following from my comments in MICS 2019 main report.

“Evidence-based approach” has become part of the parlance of those who are involved in development for quite some time now. And for us to “walk the talk” regular collection and analysis of statistically reliable data and its actual use for informed decision-making is vital. The MICS was born in 1990s exactly for that purpose.

Therefore, I expect the field level implementing officials, government, and NGOs to use the MICS district data to identify gaps of achievements of desired results and retune the implementing strategy and actions accordingly.

On this occasion, I would like to express my sincerest appreciation of the enormous work done by the Bangladesh Bureau of Statistics (BBS) for planning, implementing, and preparation of the district report for the 2019 MICS; and the significant role it plays in providing reliable information for the country’s development planning and actions.

Statistics and Informatics Division (SID)
Ministry of Planning
Government of the People's Republic of Bangladesh

ACKNOWLEDGEMENT

It is my immense pleasure to acknowledge the contributions of those who were engaged in conducting the survey 'Multiple Indicator Cluster Survey (MICS) 2019' and preparing the 'District Summary Findings Report'. Bangladesh Bureau of Statistics (BBS) conducted this Survey in collaboration with UNICEF Bangladesh using two-stage stratified cluster sampling method. Total of 3220 Primary Sampling Units (PSUs) were selected from where 64,400 households were enumerated. This report contains district representative data for 102 indicators spreading in 11 chapters.

I would like to express my deep sense of gratitude to Honourable Secretary, Statistics and Informatics Division Mr. Mohammad Yamin Chowdhury and Respected Director General, Bangladesh Bureau of Statistics Mr. Mohammad Tajul Islam for their valuable suggestions, continuous guidance and all out support for smooth completion of all activities and bringing the report into its final shape.

It is worth mentioning that UNICEF Bangladesh has provided financial and technical support in the implementation of the 'Multiple Indicator Cluster Survey 2019'. I take the opportunity to express my indebtedness to Bangladesh MICS team, Global MICS team, UNFPA Bangladesh, Survey Research (SURCH) and International Centre for Diarrhoeal Disease Research, Bangladesh (icddr,b) for their cooperation and support.

I am extremely grateful to Mr. Ghose Subobrata, Deputy Director General, BBS, Professor, Muhammad Shuaib, Institute of Statistical Research and Training (ISRT), Dhaka University, Mr. Deepak Kumar Dey, Ph.D, Statistics and Monitoring Specialist & Mr. Mashiur Rahman Khan, Statistics and Monitoring Officer, UNICEF Bangladesh and all the members of the Working Committee for their technical inputs and kind cooperation in preparing the report.

I hope this report will be very useful for the policy-makers, planners, researchers, development partners and other stakeholders. Indicators generated by this survey will also be useful to monitor the progress of SDGs and DRF of the five-year plan of Bangladesh. Suggestions and comments for further improvement will be highly appreciated.

May 2021

Md. Mashud Alam

SECTION 1: INTRODUCTION

This report is based on the Bangladesh Multiple Indicator Cluster Survey (MICS), conducted in 2019 by the Bangladesh Bureau of Statistics (BBS). The survey provides statistically sound and internationally comparable data essential for developing evidence-based policies and programmes, and for monitoring progress toward national goals and global commitments.

The Bangladesh MICS 2019 results are critically important for the purposes of Sustainable Development Goals (SDGs) monitoring, as the survey produces information on 29 global SDG indicators adopted by the Monitoring and Evaluation Framework of Sustainable Development Goals (SDGs): Bangladesh Perspective, either in their entirety or partially.

The Bangladesh MICS 2019 has as its primary objectives:

- To provide high quality data for assessing the situation of children, adolescents, women and households in Bangladesh MICS 2019;
- To furnish data needed for monitoring progress toward national goals, as a basis for future action;
- To collect disaggregated data for the identification of disparities, to inform policies aimed at social inclusion of the most vulnerable;
- To validate data from other sources and the results of focused interventions;
- To generate data on national and global SDG indicators;
- To generate internationally comparable data for the assessment of the progress made in various areas, and to put additional efforts in those areas that require more attention;
- To generate behavioural and attitudinal data not available in other data sources.

Sample Design

The sample for the Bangladesh MICS 2019 was designed to provide estimates for a large number of indicators on the situation of children and women at the national level, for urban and rural areas, for eight divisions and sixty-four districts. The number of primary sampling unit (PSU) and number of sampled households in the survey were 3,220 and 64,400 respectively. The urban and rural areas within each district was identified as the main sampling strata and the sample of households were selected in two stages. Within each stratum, a specified number of census enumeration areas were selected systematically with probability proportional to size. After a household listing was carried out within the selected enumeration areas, a systematic sample of 20 households was drawn in each sample PSUs.

Data Collection Method

MICS survey utilizes Computer-Assisted Personal Interviewing (CAPI). The data collection application was based on the CSPro (Census and Survey Processing System) software, Version 6.3, including a MICS dedicated data management platform. Procedures and standard programs developed under the global MICS programme were adapted to the Bangladesh MICS 2019 final questionnaires and used throughout. The CAPI application was tested in Gazipur district during October 7-15, 2018. Based on the results of the CAPI-test, modifications were made to the questionnaires and application.

Training

Training for the fieldwork was conducted for 29 days during December 12, 2018 to January 16, 2019. Training included lectures on interviewing techniques and the contents of the questionnaires, and mock interviews between trainees to gain practice in asking questions. Participants first completed full training on paper questionnaires, followed by training on the CAPI application. The trainees spent two-day with paper questionnaires, one day with CAPI, and one full day on a pilot survey in both urban and rural locations of Manikganj district. The training agenda was based on the template MICS6 Training Agenda.

Fieldwork

The data were collected by 33 teams; each was comprised of four interviewers, one measurer and a supervisor. Fieldwork began on January 19, 2019 and concluded in June 1, 2019.

Data were collected using tablet computers running the Windows 10 operating system, utilising a Bluetooth application for field operations, enabling transfer of assignments and completed questionnaires between supervisor and interviewer tablets.

Fieldwork Quality Control Measures

Team supervisors were responsible for the daily monitoring of fieldwork. Mandatory re-interviewing was implemented on one household per cluster. Daily observations of interviewer skills and performance was conducted.

During the fieldwork period, each team was visited multiple times by survey management team members and field visits were arranged for UNICEF MICS Team members.

Throughout the fieldwork, field check tables (FCTs) were produced weekly for analysis and action with field teams. The FCTs were customized versions of the standard tables produced by the MICS Programme.

Data Management, Editing and Analysis

Data were received at the central office of Bangladesh Bureau of Statistics (BBS) via Internet File Streaming System (IFSS) integrated into the management application on the supervisors' tablets. Whenever logistically possible, synchronization was daily. The central office communicated application updates to field teams through this system.

During data collection and following the completion of fieldwork, data were edited according to editing process described in detail in the Guidelines for Secondary Editing, a customized version of the standard MICS6 documentation.

Data were analysed using the Statistical Package for Social Sciences (SPSS) software, Version 23. Model syntax and tabulation plan developed by UNICEF were customized and used for this purpose.

^A Maternity allowance, Employment generation, Food support, Retirement pension for Government employees and families, Allowances (old age /disabled/widow/freedom fighters/shaheed families), school tuition or school related other support for any household member age 5-24 years, and any other external assistance program

ANNEX: LIST OF INDICATORS WITH DEFINITION

ANNEX: LIST OF INDICATORS WITH DEFINITION

MICS INDICATOR	SDG	Module	Definition	
Characteristics of respondents				
SR.2	Literacy rate (age 15-24 years)		WB	Percentage of women age 15-24 years who are able to read a short simple statement about everyday life or who attended secondary or higher education
SR.8	Households with internet		HC	Percentage of households that have access to the internet by any device from home
SR.10	Ownership of mobile phone	5.b.1	MT	Percentage of women age 15-49 years who own a mobile phone
SR.12a SR.12b	Use of internet	17.8.1	MT	Percentage of women age 15-49 years who used the internet (a) during the last 3 months (b) at least once a week during the last 3 months Percentage of women age 15-24 years who used the internet (a) during the last 3 months (b) at least once a week during the last 3 months
SR.18	Children’s living arrangements		HL	Percentage of children age 0-17 years living with neither biological parent
SR.19	Prevalence of children with one or both parent’s dead		HL	Percentage of children age 0-17 years with one or both parent’s dead
SR.20	Children with at least one parent living abroad		HL	Percentage of children age 0-17 years with at least one biological parent living abroad
Thrive: Reproductive and maternal health				
TM1.1	Total fertility rate		CM / BH	Total fertility rates (women age 15-49 years) for the three-year period preceding the survey
TM.2	Early childbearing		CM/BH	Percentage of women age 20-24 who have had a live birth before age 18
TM.3	Contraceptive prevalence rate		CP	Percentage of women age 15-49 years currently married who are using (or whose partner is using) a (modern or traditional) contraceptive method)

MICS INDICATOR		SDG	Module	Definition
TM.4	Need for family planning satisfied with modern contraception ¹	3.7.1 & 3.8.1	UN	Percentage of women age 15-49 years currently married who have their need for family planning satisfied with modern contraceptive methods
TM.5a Tm 5b	Antenatal care coverage	3.8.1	MN	Percentage of women age 15-49 years with a live birth in the last 2 years who during the pregnancy of the most recent live birth were attended (a) at least once times by skilled health personnel (b) at least four times by any provider
TM.6	Content of antenatal care		MN	Percentage of women age 15-49 years with a live birth in the last 2 years who during the pregnancy of the most recent live birth, at least once, had blood pressure measured and gave urine and blood sample as part of antenatal care.
TM.7	Neonatal tetanus protection		MN	Percentage of women age 15-49 years with a live birth in the last 2 years who during the pregnancy of the most recent live birth were given at least two dose of tetanus toxoid containing vaccine or had received the appropriate number of doses with appropriate interval prior to the most recent birth
TM.8	Institutional deliveries		MN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live birth was delivered in a health facility
TM.9	Skilled attendant at delivery	3.1.2	MN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live birth was attended by skilled health personnel
TM.10	Caesarean section		MN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live birth was delivered by caesarean section
TM.11	Children weighted at birth		MN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live-born child was weighted at birth
TM.13	Post-natal health check for the newborn		PN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live-born child received a health check while in facility or at home following delivery, or a post-natal care visit within 2 days after delivery
TM.15	Skin-to-skin care		MN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live-born child was placed on the mother's bare chest after birth
TM.16	Delayed bathing		MN	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live-born child was first bathed more than 24 hours after birth
TM.20	Post-natal health check for the mother		MN	Percentage of women age 15-49 years with a live birth in the last 2 years who received a health check while in facility or at home following delivery, or a post-natal care visit within 2 days after delivery of their most recent live birth
TM.29	Comprehensive knowledge about HIV prevention among young people		HA	Percentage of women age 15-24 years who correctly identify the two ways of preventing the sexual transmission of HIV, who know that a healthy-looking person can be HIV-positive and who reject the two most common misconceptions about HIV transmission

¹ See Table TM.3.3 for a detailed description

MICS INDICATOR		SDG	Module	Definition
--	Women who have heard of HIV		HA	Percentage of women age 15-49 years who have heard of HIV
TM.30	Knowledge of mother-to-child transmission of HIV		HA	Percentage of women age 15-49 years who correctly identify all three means ² of mother-to-child transmission of HIV
TM.31	Discriminatory attitudes towards people living with HIV		HA	Percentage of women age 15-49 years reporting having heard of HIV who report discriminatory attitudes ³ toward people living with HIV
TM.32	People who know where to be tested for HIV		HA	Percentage of women age 15-49 years who state knowledge of a place to be tested for HIV
TM.35a	HIV counselling during antenatal care		HA	Percentage of women age 15-49 years with a live birth in the last 2 years who received antenatal care at least once by skilled health personnel during the pregnancy of the most recent live birth and during an ANC visit received counselling on HIV ⁴

Thrive: Child health, nutrition and development

TC.18	Primary reliance on clean fuels and technologies for cooking and lighting	7.1.2	EU	Percentage of household members with primary reliance on clean fuels and technologies for cooking and lighting ⁵
-	An episode of diarrhoea		CA	Percentage of children age 0-59 months for whom the mother/caretaker reported an episode of diarrhoea in the last two weeks
-	Symptoms of ARI		CA	Percentage of children age 0-59 months for whom the mother/caretaker reported symptoms of acute respiratory infection (ARI) in the last two weeks
-	An episode of fever		CA	Percentage of children age 0-59 months for whom the mother/caretaker reported fever in the last two weeks
TC.30	Children ever breastfed		MN	Percentage of most recent live-born children to women with a live birth in the last 2 years who were ever breastfed
TC.31	Early initiation of breastfeeding		MN	Percentage of most recent live-born children to women with a live birth in the last 2 years who were put to the breast within one hour of birth
-	Within one day of birth		MN	Percentage of most recent live-born children to women with a live birth in the last 2 years who were put to the breast within one day of birth
TC.37	Age-appropriate breastfeeding		BD	Percentage of children age 0-23 months appropriately fed ⁶ during the previous day

² Transmission during pregnancy, during delivery, and by breastfeeding

³ Respondents who answered no to either of the following two questions: 1) Would you buy fresh vegetables from a shopkeeper or vendor if you knew that this person had HIV? 2) Do you think children living with HIV should be able to attend school with children who are HIV negative?

⁴ Someone talked with the respondent about all three of the following topics: 1) Babies getting the HIV from their mother, 2) preventing HIV and 3) getting tested for HIV

⁵ Household members living in households that report no cooking, no space heating, or no lighting are not excluded from the numerator

MICS INDICATOR		SDG	Module	Definition
TC.43	Bottle feeding		BD	Percentage of children age 0-23 months who were fed with a bottle during the previous day
TC.44a	Underweight prevalence		AN	Percentage of children under age 5 who fall below (a) minus two standard deviations (moderate and severe) (b) minus three standard deviations (severe) of the median weight for age of the WHO standard
TC.45a	Stunting prevalence	2.2.1	AN	Percentage of children under age 5 who fall below (a) minus two standard deviations (moderate and severe) (b) minus three standard deviation (severe) of the median height for age of the WHO standard
TC.46a TC.46b	Wasting prevalence	2.2.2	AN	Percentage of children under age 5 who fall below (a) minus two standard deviations (moderate and severe) (b) minus three standard deviations (severe) of the median weight for height of the WHO standard
TC.47a TC.47b	Overweight prevalence	2.2.2	AN	Percentage of children under age 5 who are above (a) two standard deviations (moderate and severe) of the median weight for height of the WHO standard
TC.48	Iodized salt consumption		SA	Percentage of households with salt testing positive for any iodide/iodate among households in which salt was tested or where there was no salt
TC.49a TC.49b TC.49c	Early stimulation and responsive care		EC	Percentage of children age 24-59 months engaged in four or more activities to provide early stimulation and responsive care in the last 3 days with (a) Any adult household member (b) Father (c) Mother
TC.50	Availability of children's books		EC	Percentage of children under age 5 who have three or more children's books
TC.51	Availability of playthings		EC	Percentage of children under age 5 who play with two or more types of playthings
TC.53	Early child development index	4.2.1	EC	Percentage of children age 36-59 months who are developmentally on track in at least three of the following four domains: literacy-numeracy, physical, social-emotional, and learning

Learn

⁶ Infants age 0-5 months who are exclusively breastfed, and children age 6-23 months who are breastfed and ate solid, semi-solid or soft foods

MICS INDICATOR		SDG	Module	Definition
LN.1	Attendance to early childhood education		UB	Percentage of children age 36-59 months who are attending an early childhood education programme
LN.2	Participation rate in organised learning (adjusted)	4.2.2	ED	Percentage of children in the relevant age group (one year before the official primary school entry age) who are attending an early childhood education programme or primary school
LN.5a LN.5b LN.5c	Net attendance ratio (adjusted)		ED	Percentage of children of (a) primary school age currently attending primary ⁷ or secondary school (b) lower secondary school age currently attending lower secondary school or higher (c) upper secondary school age currently attending upper secondary school or higher
LN.7a LN.7b	Gross intake rate to the last grade		ED	Rate of children attending the last grade for the first time to children at appropriate age to the last grade (a) Primary school (b) Lower secondary school
LN.8a LN.8b LN.8c	Completion rate		ED	Percentage of children above the intended age for the last grade who have completed that grade (a) Primary school (b) Lower secondary school (c) Upper secondary school
LN.9	Effective transition rate to lower secondary school		ED	Percentage of children attending the last grade of primary school during the previous school year who are not repeating the last grade of primary school and in the first grade of lower secondary school during the current school year
LN.11b LN.11c LN.11d	Education Parity Indices (a) Gender	4.5.1	ED	Net attendance ratio (adjusted) for girls divided by net attendance ratio (adjusted) for boys (b) primary school (c) lower secondary school (d) upper secondary school
LN.22a LN.22b LN.22c LN.22d	Children with foundational reading and number skills	4.1.1	FL	Percentage of children who successfully completed three foundational reading tasks (a) Age 7-14 (b) Age for grade 2/3 (c) Attending grade 2/3 Percentage of children who successfully completed four foundational number tasks (d) Age 7-14

⁷ Primary school: 1-5 grades; Lower secondary school: 6-8 grades; upper secondary school: 9-10 grades; higher indicates 11-12 grades and above

MICS INDICATOR	SDG	Module	Definition	
Protected from violence and exploitation				
PR.1	Birth registration	16.9.1	BR	Percentage of children under age 5 whose births are reported registered with a civil authority
PR.2	Violent discipline	16.2.1	UCD – FCD	Percentage of children age 1-14 years who experienced any physical punishment and/or psychological aggression by caregivers in the past one month
PR.3	Child labour	8.7.1	CL	Percentage of children age 5-17 years who are involved in child labour ⁸
PR.4a PR.4b	Child marriage	5.3.1	MA	Percentage of women age 20-24 years who were first married (a) before age 15 (b) before age 18
-	Child marriage		MA	Percentage of women age 20-49 years who were first married (a) before age 15 (b) before age 18
PR.5	Young people age 15-19 years currently married		MA	Percentage of women age 15-19 years who are married
PR.6	Polygyny		MA	Percentage of women age 15-49 years who are in a polygynous union
PR.14	Safety	16.1.4	VT	Percentage of women age 15-49 years feeling safe walking alone in their neighbourhood after dark
PR.15	Attitudes towards domestic violence		DV	Percentage of women age 15-49 years who state that a husband is justified in hitting or beating his wife in at least one of the following circumstances: (1) she goes out without telling him, (2) she neglects the children, (3) she argues with him, (4) she refuses sex with him, (5) she burns the food
Equitable chance in live				
EQ.3	Population covered by social transfers	1.3.1	ST – ED	Percentage of household members living in households that received any type of social transfers and benefits in the last 3 months

⁸ Child labourers are defined as children involved in economic activities or in household chores above the age-specific thresholds. While the concept of child labour includes exposure to hazardous working conditions, and this is collected in MICS and was previously included the reported indicator, the present definition, which is also used for SDG reporting, does not include children who are working under hazardous conditions. See Tables PR 3.1-4 for more detailed information on thresholds and classifications.

MICS INDICATOR		SDG	Module	Definition
EQ.5	Children in the households that received any type of social transfers		ST – ED	Percentage of children under age 18 living in the households that received any type of social transfers in the last 3 months
EQ.6	School-related support		ED	Percentage of children and young people age 5-24 years currently attending school that received any type of school-related support in the current/most recent academic year
EQ.7	Discrimination	10.3.1 & 16.b.1	VT	Percentage of women age 15-49 years having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law
EQ.10a EQ.10b	Happiness		LS	Percentage of women who are very or somewhat happy (a) age 15-24 (b) age 15-49
